ABOUT

Backend developer with 2+ years of commercial experience building high-load distributed systems. Specialized in microservice architecture, event-driven systems, and performance optimization. Full development cycle experience — from architecture design and coding to deployment and production support. Worked in fintech, crypto, and enterprise CRM/ERP domains. Quick to onboard into new challenges and skilled at building clean, scalable architecture.

WORK EXPERIENCE

Backend Developer — Aurora Holding, Almaty

December 2025 — May 2026

- Developed and shipped 10+ key backend modules of a CRM/ERP system to production.
- Designed microservice architecture on NestJS (Node.js); implemented 40+ GraphQL and REST endpoints.
- Introduced event-driven communication via Kafka/NATS, reducing service coupling and improving scalability.
- Participated in the development of a BPM engine for business process automation, architectural and system design.
- Refactored the backend codebase: reduced code size by ~30% while preserving full functionality.
- Optimized SQL queries — average heavy query time reduced by up to 40%; background jobs accelerated up to 2x.
- Worked in Scrum/Agile (Jira); collaborated closely with the frontend team, implemented parts of the UI in React.

Software Engineer — Freelance, Remote

August 2023 — November 2025

- Developed backend services in Python and Golang: APIs, integrations, data processing, business process automation.
- Built data aggregators and parsers: collecting and normalizing data from 10+ external sources; task queues sped up processing by 3x.
- Implemented frontend in TypeScript + React + Next.js; integrated payment and crypto APIs for fintech clients.
- Led projects end-to-end: from requirements gathering to deployment; infrastructure optimization reduced costs and task time by up to 50%.

EDUCATION

METU, Almaty — Bachelor's Degree, Information Technologies

September 2023 — June 2026 | GPA: 3.1 / 4.0

Participated in hackathons (team prototypes, rapid MVP launches). Competitively selected for nFactorial Incubator 2024.

TECHNICAL SKILLS

Backend: Node.js, NestJS, Python, Golang, PostgreSQL, SQL, GraphQL, REST API, gRPC, WebSockets, Microservices, Event-Driven Architecture, Kafka / NATS / RabbitMQ, Redis, BPM / Workflow Engines, High-load & Scalable Systems

Data & Automation: Data aggregation, web scraping, background jobs, async processing, ETL, parsing

DevOps: Docker, Docker Compose, CI/CD, Nginx, Linux, Git, GitLab/GitHub

Frontend: TypeScript, JavaScript, React, Next.js, SCSS/CSS, Tailwind, MUI

Languages: Kazakh (Native) · Russian (Advanced) · English (B2)
